CAREER OBJECTIVE

Motivated and detail-oriented aspiring Full-Stack Web Developer with hands-on experience in building responsive web applications using JavaScript, React.js, Next.js, and MongoDB. Currently expanding technical expertise in frontend and backend development, database management, and modern web technologies. Seeking an entry-level opportunity to apply technical knowledge, strengthen problem-solving abilities, and contribute to developing efficient, scalable, and user-friendly solutions while supporting organizational growth.

TECHNICAL SKILLS

Frontend Development

- HTML5, CSS3, JavaScript (ES6+)
- React.js
- Next.js
- Tailwind CSS
- Responsive Web Design

Database

- MongoDB
- Basic Database Operations (CRUD)

Backend Development

- Node.js
- Express.js
- REST API Fundamentals
- Basic Authentication Concepts

Programming & Development Tools

- TypeScript
- Git & GitHub
- VS Code

PROJECTS

1. FITLOG – WORKOUT LIBRARY & PLANNING WEB APP

Technologies: Next.js, React, TypeScript, Tailwind CSS, DaisyUI, REST API, LocalStorage

- Built a responsive workout library with detailed exercise information.
- Integrated REST API to fetch and display workout data.
- Implemented daily workout planning and saved workout features.
- Used LocalStorage to persist workout plans and saved exercises.
- Live Demo: https://my-assignment-a6.vercel.app/

2. DEVSTACK – TECHNOLOGY EXPLORATION & STACK BUILDER

Technologies: React, TypeScript, Vite, Tailwind CSS, JavaScript

- Developed a React-based application to explore different web technologies.
- Implemented interactive technology selection to build custom technology stacks.
- Used React Hooks (useState, useEffect) for state management and data loading.
- Used React Hooks (useState, useEffect) for state management and data loading.
- Live Demo: https://astounding-croissant-a8714a.netlify.app/
  Project Type: Frontend Web Application
